EDUCATION

University of Guelph

Guelph, Ontario

Bachelor of Computing, Computer Science (AI Specialization, Minor in Business)

Sep 2024 – Apr 2028

Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Operating Systems

Intermediate Programming, Software Systems Development and Integration, Web Design

EXPERIENCE

Technology Research Intern

Sep 2026

Bank of Montreal (BMO)

Toronto, Ontario

- Incoming intern on the **Enterprise Architecture and Innovation** team

Anti-Money Laundering Investigator Intern

May 2026 – Present

Bank of Montreal (BMO)

Toronto, Ontario

- Developed an AI-assisted workflow that converts client and transaction data into investigation reports
- Cut investigation time from **40 minutes to 5 minutes** by automating report generation (**87.5% reduction**)
- Conducted AML investigations involving **high-volume** transaction alerts using **SQL** to identify **risk patterns**
- Piloted the AI-assisted workflow with **20 investigators** ahead of a planned team-wide rollout

Shopify Solutions Engineer Intern

May 2025 – Aug 2025

Helios Technology Solutions (Shopify Partner)

Cambridge, Ontario

- Built a **Python** tool for Shopify migrations processing **300 products/min**, cutting migration from **15 h to 1 h**
- Transformed high-volume datasets with **Pandas** and optimized **API** queries for Shopify migrations
- Deployed migration tools with **AWS Lambda** and **Amazon RDS** to improve scalability and reliability
- Built and tested integrations across the **Shopify ecosystem** using **JavaScript**, **Remix**, and **Polaris**

PROJECTS

GitZero | *Python, scikit-learn, Rich, PyDriller, pytest*

Apr 2026

- Built a **Python CLI** that audits repositories for **AI-assisted signals** using **git-history** and **static analysis**
- Developed a Random Forest **ML model** on **193 labeled repositories**, achieving **0.968 ROC-AUC**
- Designed **25+ explainable signals** across commit patterns, code structure, docstrings, and repository metadata
- Added **false-positive guards** and **50+ tests** for scoring, signal extraction, and merge histories

Credit Card Default Risk | *Python, Pandas, SQL, SQLite, Machine Learning*

Sep 2025

- Cleaned and analyzed **30K+** credit-card customer records using **SQL** and **Pandas** to study default behavior
- Built a **credit risk model** that achieved **86% predictive accuracy** in classifying high-risk customers
- Built a **Power BI** dashboard to visualize default risk by age, credit limit, education, marital status, cohort
- Documented model findings and **risk patterns** to support data-driven credit analysis and lending risk evaluation

TravelPal | *Next.js, React, TypeScript, Tailwind CSS, Convex, Clerk, Google Gemini*

May 2025

- Built a **full-stack** travel planning app with **Next.js**, **React**, **TypeScript**, and **Tailwind** at GDSC Hacks 2025
- Integrated **Google Gemini** and **Vapi** to generate **AI-powered itineraries** from real-time voice and chat queries
- Implemented **Clerk authentication** and a **Convex database** to manage users, profiles, and saved trip plans
- Calculated route distance and estimated **CO₂ emissions** to recommend lower-impact travel alternatives

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, TypeScript, C/C++, HTML/CSS, Ruby

Frontend & Backend: React, Next.js, Node.js, REST APIs, GraphQL, JSON

Data & AI: Pandas, NumPy, scikit-learn, PyTorch, Matplotlib

Cloud & Databases: AWS Lambda, Amazon RDS, Azure, SQLite, PostgreSQL

Developer Tools & Practices: Git, Docker, Power BI, Tableau, SDLC, Agile/Scrum
